Gandolapp

Logistics 4.0

What would you say is the best source of data in a truck?

The Driver and the Truck

How can I interchange information with the driver?

What would you say is an important feature when planning to reduce times in logistics?

Predictability

Is there a way to know the estimated time of arrival without calling the driver?

What does Gandolapp have to offer?

Virtual voice copilot

Voice technology
Driver centric solution
Proactive
Task automation

On route

Well-being

- Parking reservations

- Formación en ruta

- Where to eat
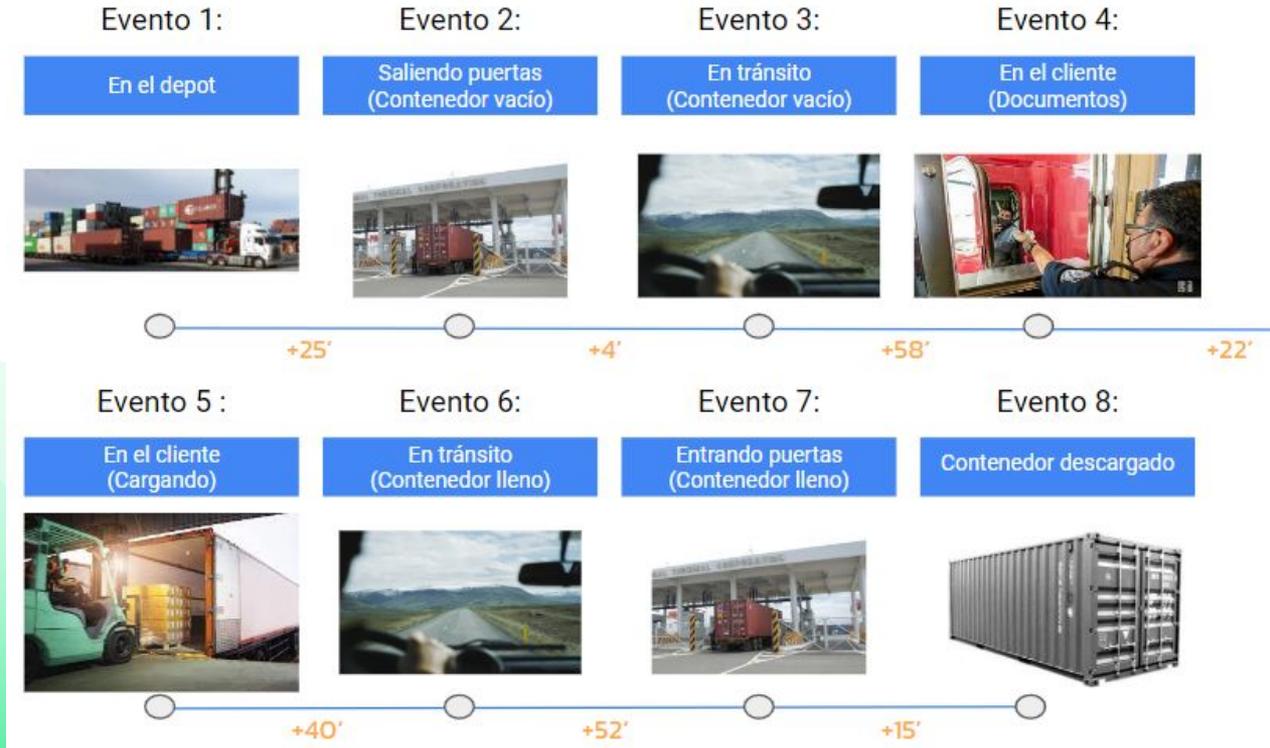

Operations

- Automatic checklist*
